

Cell Transport: Diffusion - movement of particles from an area of high concentration to low concentration. Will want to Reach Equilibrium.

Think of: 700 Hall
The mall → Black Friday
Concert, Football
Clostrophobia Game

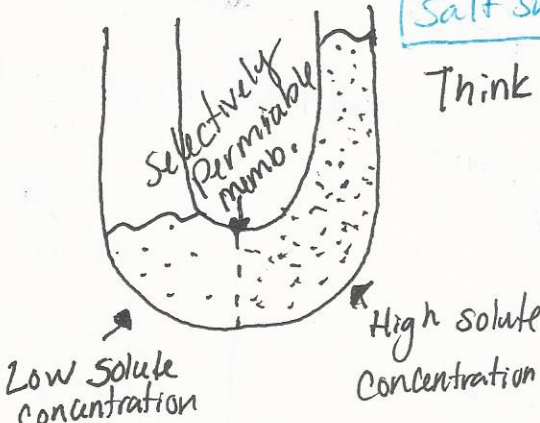

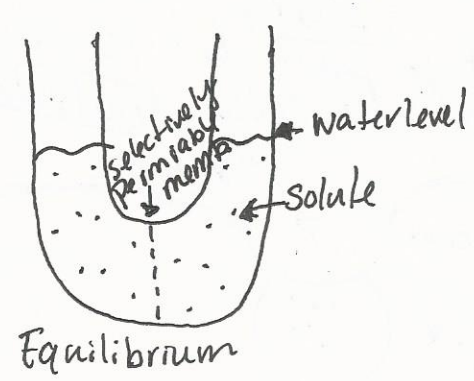

Facilitated Diffusion: movement of particles using protein channels that move particles from an area of high concentration to a low concentration, will reach Equilibrium
Facit → (Easy)

Think of: Freeway
• Fast Pass @ Six Flags
• Emergency exit @ movies

Movement of Water
Osmosis - Diffusion of water across a selectively permeable membrane.
• water moves in the direction of a solute. (Salt, Sugar) Salt sucks!
Salt sucks up water! (Absorb)

Think of: Boarder towards the US.
Concert
Transition between classes
A fight
• Football Game
